The Sociology of Knowledge

May 24 2022 These two volumes contain articles from 1926 to 1996, both classic and end-of-millennium literature which are important in understanding the sociology of knowledge. Volume I covers the precursors, and Volume II covers later sociologies of knowledge and the future of the debate.

Sharing Knowledge

Mar 02 2023 This book develops a novel account of assertion in terms of its function of sharing knowledge.

[Knowledge Based Systems](#)

[Methods](#) Jan 26 2020

The primary audience for this text

is that large group of individuals in IT departments now contemplating the prospect of developing KBS within their own organisations. The aim of the book is to provide a framework for understanding how KBS technology can be used to increase the range of Information Systems currently being developed and to describe a set of the main KBS methods currently available in sufficient detail for readers to understand the essentials of these methods. This is done by providing a conceptual framework to show how the various elements of KBS fit into the development of 'conventional' software systems. The relationship between conventional and knowledge based systems and the need to integrate the two permeates the whole book. Practical advice is also given on how methods integration can be achieved. This book describes the most important methods used commercially to build knowledge based systems, and readers will be able to start building KBS in a structured way in a commercial environment. It takes the highest profile in academic methods and describes them in a way acceptable to commercial systems developers, and takes a unified view of conventional IT and KBS through the presentation

of an academically sound model.

Scientific Knowledge as a Cultural and Historical Process

Feb 27 2020 Using the analytic tools of philosophy, methodology, culturology of science and applied philosophy, the author documents an approach enabling one to treat the process of the social and cultural determination of cognition in the unity of its synchronic and diachronic aspects; to justify the culturally produced types of scientific and theoretic activity in the process of its genesis; and to elucidate ways of knowledge-realization in meaningful forms of human vital activity as an intrinsic component of its development.

Knowledge Application Feb 01 2023

[The Knowledge Book](#) May 04 2023 "The Knowledge Book" is a unique interdisciplinary reference work for students and researchers concerned with the nature of knowledge. It is the first work of its kind to be organized on the assumption that whatever else knowledge might be, it is intrinsically social. The book consists of 42 alphabetically arranged entries on key

concepts at the intersection of philosophy and sociology - what used to be called "sociology of knowledge" but is now increasingly called "social epistemology". The entries include concepts common to disciplines that in recent years have devoted more of their attention to knowledge: cultural studies, communication studies, information science, education, policy studies and business studies. Special attention is given to concepts from the emerging field of science and technology studies. Each entry presents a short, self-contained essay providing an overview of a concept and concludes with suggestions for further reading. All the entries are fully cross-referenced, allowing readers to both make connections and follow their own interests.

Knowledge, Control and Sex Jul 02 2020 The distinct terminology of "knowledge," "control," and "sex" as used in Biblical Hebrew are all conceptually related. Malul seeks to explain how these words are related and why these terms overlap semantically in the Hebrew Bible. The book is divided into four parts, covering the evidence, the idea of knowledge, and related institutions, concluding with a summary; in the course of the study, he discusses such things as carnal knowledge, the status of woman, purity/impurity, circumcision, and related topics.

Design and Development of Knowledge-Based Systems Jan 08 2021 This book focuses

on how to develop large-scale Knowledge-Based Systems within budget and on time. The authors teach step-by-step techniques through the knowledge-based system life cycle from the initial development to maintenance of the system.

Knowledge Acquisition Nov 17 2021 This important practitioner's guide is among the first to formulate a theoretical basis and derive a set of methods for consultants, knowledge engineers, and application programmers who must acquire human expert knowledge to create expert systems. By taking a cybernetic approach to the problems of knowledge acquisition, the authors use a single descriptive vocabulary to deal equally with recursive phenomena, knowledge acquisition, knowledge elicitation, expert system development, and the experts domain/knowledge base descriptions. Following a brief overview of the field, the authors focus on heuristic algorithms, the details of setting up a framework to define a given expertise, the practical interviewing process by which human experts pass on their knowledge to be modeled and coded for use in an expert system. The book concludes with a comprehensive case study selected for its broad application to all areas of knowledge acquisition.

Tradeoffs in the Utility of Learned Knowledge Jun 12 2021

The Nature of Human Knowledge According to Saint Gregory of Nyssa Mar 10 2021

Strategic Learning and Knowledge Management Mar 22 2022 Accordingly, this volume also examines processes within firms that improve both the creation and application of new knowledge in competitive and cooperative interactions between organizations. Strategic Learning and Knowledge Management challenges many notions prevalent in current discussions of knowledge and learning, such as the strategic

value of 'tacit knowledge' and the need to rely primarily on internal learning processes. Using case studies from American and European companies, the contributors bring you up to date with current thinking about managing strategically important knowledge in organizations.

Knowledge Management for School Education Apr 03 2023

This book introduces the application of knowledge management (KM) theories, practices, and tools in school organization for sustainable development. Schools in Asia Pacific have long faced a variety of challenges in terms of sustainable development under the education reforms and curriculum reforms to meet the demands of a knowledge society. Schools are inevitably expected to develop human capital for the knowledge society within the competitive global economy, and to interact with its policy environment and know how to leverage pedagogical knowledge. The high speed of expansion change and expansion of knowledge have dramatically influence the development of flexibility of teacher and school works. The nature of teacher work becomes increasingly less routine, more analytical, and disruptive yet often come with a sense of urgency and need to be more collaborative. Teachers not only require data and information, but also knowledge and experience of individual, they also need to collaborative task execution, decision making and problem

solving. Helping school leaders and teachers to manage their knowledge and become "know how" to cope with the change is important.

Introduction to Knowledge Management Sep 27 2022

This book introduces readers to a wide range of knowledge management (KM) tools, techniques and terminology for enhancing innovation, communication and dedication among individuals and workgroups. The focus is on real-world business examples using commonly available technologies. The book is set out in a clear and straightforward way, with definitions highlighted, brief case studies included that illustrate key points, dialogue sections that probe for practical applications, and written exercises. Each chapter concludes with discussion questions, review questions, and a vocabulary review. An Online Instructor's Guide is available.

Shifting Boundaries of

Knowledge Dec 27 2019 In 2004, South Africa's National Research Foundation (NRF) initiated a foresight exercise on the challenges of knowledge-making in social sciences, law, and the humanities (SSLH) in South Africa in the 21st century. The main contributions to this project are collected in this volume. It is designed to open horizons about the value of and prospects for SSLH research, while simultaneously promoting and stimulating scholarship in this domain. The contributions provide a useful starting point for thinking

about the current state of SSLH research, and gives researchers locked into single disciplinary perspectives a taste of the debates and trends in allied disciplines. They also provide an organizing frame for a new, broad-based, open conversation among the many interested parties involved in producing, reproducing and disseminating knowledge.

Domain Knowledge for Interactive System Design

Nov 29 2022 This book describes how domain knowledge can be used in the design of interactive systems. It includes discussion of the theories and models of domain, generic domain architectures and construction of system components for specific domains. It draws on research experience from the Information Systems, Software Engineering and Human Computer Interaction communities.

Knowledge Development in Marketing Aug 03 2020

Knowledge and Discretion in Government Regulation Dec 07

2020 Well-documented and clearly-written, this important volume examines the interaction between scientific and engineering knowledge and the exercise of policy discretion in environmental, health, and safety regulation. The findings presented in the work derive in large part from a three-year study of two regulatory programs, the hazardous air pollutant program of the Environmental Protection Agency and the occupational health standards program of the Occupational Safety and Health

Administration, and are based upon the activities within these programs between 1971 and 1980. The author's first-hand experience in the Office of Science and Technology in the Executive Office of the President during the Carter Administration further enhances the authority and thoroughness of the volume.

Knowledge Organization Oct 29 2022

The Unity of Knowledge and Action Jul 14 2021 Uses the thought of Wang Yang-ming, John Dewey, and Alfred North Whitehead to explain a more coherent theory of knowledge.

Understanding Knowledge Management Jun 24 2022

"Understanding Knowledge Management presents an integrated critique of the Knowledge Management theory perspective, aiming at discussing the ontological, epistemological, and political qualities of concepts such as "knowledge" and "management". "

Knowledge and Mind Sep 03 2020 Essays honoring Norman Malcolm. "Books and articles by Norman Malcolm": pages [259]-263. Includes bibliographical references and index.
