* Have you taken a clock apart but can't get it back together? This book is for you.

* Are you fascinated with clocks, have several you have bought but do not work? This book is for you.

Be bold. Take on your project. This book will hold your hand every step of the way and guide you to success. **YOU CAN DO IT.**

Why does a Grandfather Clock Stop Working? Often, the works are dirty, need oiling, or, most likely, both. When the clock stops, think of it as “ the oil light is on ” . It ’ s a “ cry for help ” . Without oil, the metal parts grind on each other, causing serious wear and damage. Oil also attracts dust which can make the oil “ gummy ’ and add drag to its operation until it can no longer overcome the friction. If a clock is oiled regularly [every three to five years], chances are you will only ever need to

re-oil your clock. If the clock is allowed to run until it stops, the only sure way to service it is to remove the works from its case, dismantle the parts, clean, service, and put the movement back together with fresh oil and correct adjustment.

This book will teach you how to do all this. "CAR OWNERSHIP for Women" helps you buy right, stay safe, and extend the life of your car.
