The new edition of Jan Beaty's best-selling book has undergone an extensive revision. The book's original features and organization remain, while new research, issues, and more extensive coverage of observation is included in the new edition. Chapters 1 and 2 were reorganized and expanded to include the basics of observation. The text itself has become more streamlined, more reader-friendly, with fewer chapters (12 instead of 14), yet with many more boxed ideas. Other examples of observation tools that have been added include running records, rubrics, rating scales, portfolios, documentation panels, and other forms of visual documentation. Strategies for working with dual language learners are included throughout the book. The reorganization and restructuring of the text improves on its past success; the simplification and improvements will appeal to students and instructors alike. What emerges is the most current observation text on the market, modernized to reach today's population of early childhood education students. An integrated language arts approach to literacy development that brings early childhood perspectives on how children learn in pre-kindergarten through grade three, together with explicit teaching of literacy skills and strategies teachers need to make it all work. Pre-service and in-service teachers get a wealth of valuable information for making children active participants in the process of literacy development with this integrated approach to language arts. The book encourages teaching reading, writing, listening, thinking, and viewing at the same time, using each skill to develop the others, and discusses both constructivist problem-solving teaching and more explicit systematic instruction. Through both theoretical and research-based rationales, plus extensive practical applications, renowned author Lesley Mandel Morrow presents literacy development as an active process between children and adults to create meaning and real purpose—and helps pre- and in-service teachers grasp the scope and complexity of early literacy development. This comprehensive, balanced approach to literacy teaching and learning covers oral language development, word study, phonological awareness, phonics, comprehension, listening and writing. The reader is provided with a complete picture of early literacy development. This established collection of readings uses articles and photo-essays to apply psychology to personal growth and development. This new edition is fully revised to incorporate recent developments on the international stage, including new peace operations in Mali and the Central African Republic; ongoing UN efforts to manage the crises in Libya, Syria, and Iraq; the Iran Nuclear Deal; and the new Sustainable Development Goals. The authors discuss how international law frames the controversies at the UN and guides how the UN responds to violence and insecurity, gross violations of human rights, poverty, underdevelopment, and environmental degradation.
