This first edition volume demystifies the complex topic of flow cytometry by providing detailed explanations and nearly 120 figures to help novice flow cytometry users learn and understand the bedrock principles necessary to perform basic flow cytometry experiments correctly. The book divides the topic of flow cytometry into easy to understand sections and covers topics such as the physics behind flow cytometry, flow cytometry lingo, designing flow cytometry experiments and choosing appropriate fluorochromes, compensation, sample preparation and controls and ways to assess cellular function using a variety of flow cytometry assays. Written as a series of chapters whose concepts sequentially build off one another, using the list of materials contained within each section along with the readily reproducible laboratory protocols and tips on troubleshooting that are included, readers should be able to reproduce the data figures presented throughout the book on their way to mastering sound basic flow cytometry techniques. Easy to understand and comprehensive, *Flow Cytometry Basics for the Non-Expert* will be a valuable resource to novice flow cytometry users as well as experts in other biomedical research fields who need to familiarize themselves with a basic

understanding of how to perform flow cytometry and interpret flow cytometry data. This book is written for both scientists and non-scientists in academia, government, biotechnology, and medicine. Vols. 9-17 include decisions of the War Labor Board. Established in the 1940s to produce and sell domestic labour-saving devices, Kenwood has survived and evolved to become a British icon. It is high time someone recorded (almost) everything they ever made, and put a date to it, so that future generations can make sense of what was happening in U.K. kitchens, in business, in industrial design and in manufacturing. The first item off the production line, the Turnover Toaster, was made by Roger Laurence and Kenneth Wood in 1947, and over a hundred separate domestic objects would follow over the next thirty years. Inside this book, you will find full-colour photographs, descriptions and original retail prices of these mixers, accessories and appliances, right up to the model A901 Chef, first launched in 1976. Among many others, this book covers the A100 Turnover Toaster, A200 Mixer, A700 Chef, A600 Activair, A701/A Chef, A724 Mk I and II Coffee Mills, A740 Juice Extractor, A500 Roto-Blend, A955 Kenmix Blender, A1212 Dishwasher, A520 Blender, A888 MatchMaker Rollers and A180 Sodastream. If you are a collector, historian, hobbyist, enthusiast, or just like looking at pictures of old domestic objects and lovely design, this book is for you. Inside: how they competed with the likes of Sunbeam, KitchenAid and Moulinex; from their origins in Woking to their current site in Havant; the expectations of women in the home from the 1950s, through the 1960s and into the 1970s; the restrictions upon food preparation and baking from the effects of rationing; the relative cost of these appliances to average earnings at the time; sexist advertisements; beautiful vintage kitchenware and kitchenalia; and much, much more!
