Learning the numbers 1 to 30 is a snap with these fun-to-do instant practice pages! 100 days of practice counting money, learning fractions, and telling the time. Three core areas of maths that students often need additional help to master. Start by counting groups of coins that have a value of a pound or less. Slowly learn to count greater amounts of money that include small

and large notes too. Add and subtract values, and even learn to make change. Learn fractions one step at a time. Start with simple fractions and eventually learn to add and subtract mixed numbers. Telling the time is one of the more difficult concepts for children to learn. Gradually progress from learning to tell hours, to quarter hours. Eventually tell time in five minute and minute increments. This is a great workbook to start out with. Most students will grasp the concepts within each of the three sections. If a student still needs more practice, Humble Math has workbooks that provide additional practice for these

concepts too. Specifications:
