**Disability, Care and Family Law** Nov 09 2021 This book explores the series of issues that emerge at the intersection of disability, care and family law. Disability studies is an area of increasing academic interest. In addition to a subject in its own right, there has been growing concern to ensure that mainstream subjects diversify and include marginalised voices, including those of disabled people. Family law in modern times is often based on an "able-bodied autonomous norm" but can fit less well with the complexities of living with disability. In response, this book addresses a range of important and highly topical issues: whether care proceedings are used too often in cases where parents have disabilities; how the law should respond to children who care for disabled parents – and the care of older family members with disabilities. It also considers the challenges posed by the UN Convention on the Rights of Persons with Disabilities, particularly around the different institutional and state responsibilities captured in the Convention, and around decision-making for both disabled adults and children. This interdisciplinary collection – with contributors from law, criminology, sociology and social policy as well as from policy and activist backgrounds – will appeal to academic family lawyers and disability scholars as well as students interested in issues around family law, disability and care.

**Perspectives for the Unification and Harmonisation of Family Law in Europe** Dec 18 2019 Is the unification and harmonisation of (international) family law in Europe necessary? **The Present and Future of European Family Law** Oct 20 2022 The Present and Future of European Family Law explores the essence of European family law – and what its future may be. It compares and analyses existing laws and court decisions, identifies trends in legislation and jurisprudence, and also forecasts (and in some cases proposes) future developments. It establishes that while there is, at present, no comprehensive European family law, elements of an ‘institutional European family law’ have been created through decisions by the European Court on Human Rights and by the Court of Justice of the European Union as well as other EU instruments. At the same time an ‘organic European family law’ is beginning to emerge. The laws in many European jurisdictions have developed similarly and have ‘grown together’, not only as a result of the aforementioned institutional pressures, but also as a result of societal developments, and comparable reactions to medical and societal advances and changes. Hence there already is a body of institutional and organic European family law, and it will continue to grow. This book, and the others in the set, will serve as an invaluable resource for anyone interested in family law. It will be of particular use to students and scholars of comparative and international family law, as well as family law practitioners.

**Making Law for Families** Jul 25 2020 Making Law for Families is the result of a workshop organized by Mavis Maclean and held between May 26 and June 2, 1999, at the international Institute for the Sociology of Law (IISL) in Onati, Spain. This book analyzes the concept of the family in the context of increasing challenges and questions created by multicultural societies in ever more complicated international and transnational legal contexts. How is the family defined across cultural and national divides? To what extent and under what conditions should any particular state intervene? The collected essays in this volume seek to answer these and other difficult questions through grounded empirical research and insightful appreciation of how political systems function in various countries. An underlying concern is to explore to what extent and under what terms will the family endure in the future as a basic unit of social management and control. This book is part of the Oñati International Series in Law and Society.

*Landmark Cases in Family Law* Mar 25 2023 There are a number of important (landmark) cases in the development of Family Law in England and Wales that deserve detailed examination and lend themselves particularly well to historical examination. Family law cases tend to raise highly controversial issues, often on striking facts, frequently provoking wider social debate and/or extensive publicity. Consequently, the landmark cases chosen for this collection provide considerable scope, not only for doctrinal analysis and explanation of the importance and impact of the decisions, but also for in-depth examination of the social or policy developments that influenced them. The stories behind the cases provide a fascinating insight into the complexities of family life and the drama that can be found in the family courts. In recent years, Family Law has seen enormous changes in law's engagement with the notion of 'family', with the enactment, for example, of the Civil Partnership Act 2004, the Gender Recognition Act 2004 and, more recently, the Human Fertilisation and Embryology Act 2008. As we begin to move forward into the new millennium, this is an excellent time to engage in detailed analyses and 'stock-taking' of the landmark decisions, many of which were decided in the 1970s, and which have shaped modern Family Law. This book provides a series of in-depth studies of the key leading cases, and will be of interest to students and lecturers alike.

**Family Law and Personal Life** Apr 14 2022 Developments in the law, scholarship, and research since 2006 form a substantial part of the second edition of this book which sets the governance of personal relationships in the context of the exercise of social and personal power. Its central argument is that this power is counterbalanced by the

presence of individual rights. This entails an analysis of the nature and deployment of rights, including human rights, and children's rights. Against that background, the book examines the values of friendship, truth, respect, and responsibility, and how the values of individualism co-exist with those of the community in an open society. It argues that central to these values is respecting the role of intimacy in personal relationships. In doing this, a variety of issues are examined, including the legal regulation of married and unmarried relationships, same-sex marriage, state supervision over the inception and exercise of parenthood (including surrogacy and assisted reproductive technology), the role of fault and responsibility in divorce law, children's rights and welfare, religion and family rights, the rights of separated partners regarding property and of separated parents regarding their children, and how states should respond to cultural diversity.

**Feminist Perspectives on Family Law** Apr 21 2020 Examining specific areas of family law from a feminist perspective, this book assesses the impact that feminism has had upon family law. It is deliberately broad in scope, as it takes the view that family law cannot be defined in a traditional way. In addition to issues of long-standing concern for feminists, it explores issues of current legal and political preoccupation such as civil partnerships, home-sharing, reproductive technologies and new initiatives in regulating family practices through criminal law, including domestic violence and youth justice.

**Family Law and the Indissolubility of Parenthood** Dec 22 2022 There are few areas of public policy in the Western world where there is as much turbulence as in family law. Often the disputes are seen in terms of an endless war between the genders. Reviewing developments over the last 30 years in North America, Europe and Australasia, Patrick Parkinson argues that, rather than just being about gender, the conflicts in family law derive from the breakdown of the model on which divorce reform was predicated in the late 1960s and early 1970s. Experience has shown that although marriage may be freely dissoluble, parenthood is not. Dealing with the most difficult issues in family law, this book charts a path for law reform that recognizes that the family endures despite the separation of parents, while allowing room for people to make a fresh start and prioritizing the safety of all concerned when making decisions about parenting after separation.

**Family Law Principles** Nov 21 2022 The aim of this book is to provide a comprehensive and accessible text covering the major aspects of family law. Family law is a dynamic part of the legal landscape and is ever evolving. It also intersects with other areas of law and involves many disciplines. An emerging theme in family law is that a thorough appreciation of social science research is essential. This book stands apart from others because it has a comprehensive chapter on social science which not only summarises the latest research but also analyses the case law to demonstrate how this research is used in family law decision-making. It also has a chapter touching on international family law, an area of increasing importance. The author team brings a unique blend of practice experience and academic expertise, to ensure this text will have a broad appeal to all readers. Students, academics, new practitioners, and also more experienced practitioners looking for a refresher, will all find Family Law Principles a useful resource.

**Normativity and Diversity in Family Law** Feb 12 2022 With regard to family law, this volume examines claims based on cultural tradition, ethnic background, custom, religious affiliation and sexual orientation, as well as various other "claims" that are not officially recognized in state law, in 15 jurisdictions around the world. The country reports seek to determine whether these claims represent a challenge to family law as conceived by the state, and if so, how these challenges are being managed. The focus lies on the interaction between (i) claims and traditions raising minority-related and diversity-related issues and (ii) the state as the addressee of these demands for accommodation. The reports identify specific instances and situations that have proven (and in many cases still are) particularly difficult to resolve. They force decision-makers to engage in a delicate balancing act between different, often clashing interests.

**Family Law** Feb 18 2020 Family law in India has a complex legal structure where different religious communities are guided by their own personal laws, each of which historically evolved under various social, religious, political, and legal influences. In two comprehensive and lucid volumes, Flavia Agnes, a leading activist and advocate in the area, examines family law in the light of social realities, contemporary rights discourse, and the idea of justice. What is unique in these volumes is that the ground level litigation practices around women's rights are interwoven with the critical analyses of the statutory provisions. Relying extensively upon case law, Volume 1 examines: the evolution of the personal laws of Hindus, Muslims, Christians, Parsis, and Jews during the colonial and postcolonial periods; how these laws are applied in contemporary questions of marriage, divorce, property rights, and succession; and

whether it is possible to bring the law in conformity with modern changes through and in both the formal, and statutory law and the pluralistic and fluid community-based practices. It also extensively examines the role of the judiciary, the political and academic debates around the issue of uniform civil code, and women's citizenship claims in a stratified and hierarchical social order.

**Convergence and Divergence of Family Law in Europe** Jul 05 2021 This volume contains the written versions of presentations given at the international conference "Convergence and Divergence of Family Law in Europe", organised in Amsterdam in September 2006. The main objective of this conference was to instigate an in-depth discussion regarding various facets of the convergence/divergence discord. Another objective was to give scholars the opportunity to present their respective views in the ongoing debate surrounding convergence, divergence and deliberate harmonisation activities in the field of family law. In the first part of this book the historical and theoretical issues of the convergence/divergence debate and the controversy surrounding the "cultural constraints" argument are discussed. The second part gives a picture of the contemporary role of convergence/divergence tendencies on a regional level in various parts of Europe. It starts with an overview of the recent trends in the renowned "Nordic co-operation" in the approximation of family laws, which is generally considered to be the most successful example of regional harmonisation of family laws in Europe. The next article deals with convergence/divergence tendencies in the development of the family law of the Spanish autonomous communities. The following two contributions offer a summary of the convergence and divergence trends in Eastern Europe against the background of such sweeping events as the fall of the Soviet Union, the disintegration of the Eastern block and the accession of a majority of the Central European countries to the EU. The third part of this volume deals with the convergence and divergence tendencies in the following particular fields of family law: marriage, divorce, same-sex relationships, establishment of parenthood and matrimonial property law.

The Psychology of Family Law Jun 23 2020 Bridges family law and current psychological research to shape understanding of legal doctrine and policy Family law encompasses legislation related to domestic relationships—marriages, parenthood, civil unions, guardianship, and more. No other area of law touches so closely to home, or is changing at such a rapid pace—in fact, family law is so dynamic precisely because it is inextricably intertwined with psychological issues such as human behavior, attitudes, and social norms. However, although psychology and family law may seem a natural partnership, both fields have much to learn from each other. Our laws often fail to take into account our empirical knowledge of psychology, falling back instead on faulty assumptions about human behavior. This book encourages our use of psychological research and methods to inform understandings of family law. It considers issues including child custody, intimate partner violence, marriage and divorce, and child and elder maltreatment. For each topic discussed, Eve Brank presents a case, statute, or legal principle that highlights the psychological issues involved, illuminating how psychological research either supports or opposes the legal principles in question, and placing particular emphasis on the areas that are still in need of further research. The volume identifies areas where psychology practice and research already have been or could be useful in molding legal doctrine and policy, and by providing psychology researchers with new ideas for legally relevant research.
