Handbook of Farm, Dairy and Food Machinery
Engineering Jun 12 2021 Handbook of Farm, Dairy and
Food Machinery Engineering is the essential reference
for engineers who need to understand those aspects of
the food industry from farm machinery to food storage
facilities to the machinery that processes and packages
our foods. The process of getting food from "farm to
fork," as the saying goes, involves more than planting,
harvesting, shipping, processing, packaging and
distributing—though those are all key components.
Effective and efficient food delivery systems are built

around processes that maximize the effort while minimizing cost, time, and resource depletion. This comprehensive reference is for engineers who design and build machinery and processing equipment, shipping containers, and packaging and storage equipment. It includes cutting-edge coverage of microwave vacuum application in grain processing, cacao processing, fruit and vegetable processing, ohmic heating of meat, facility design, closures for glass containers, double seaming, and much more. Provides cross-topic information for translational research and potential application Focuses on design and controls – written for engineers by engineers – always with practical applications in mind Includes design of machinery and facilities as well as theoretical basis for determining and predicting behavior of foods as they are handled and processed

Phosphorus Precipitation in Anaerobic Digestion Process Aug 03 2020 Anaerobic digestion is the most widely process used for the stabilisation of wastewater treatment sludge. Organic matter is transformed into CH₄ and CO₂ by the action of different bacteria groups. The main advantages are the reduction of the volume of waste sludge and the production of methane gas that can be utilized as energy supply for the process. During anaerobic digestion of activated sludge from enhanced biological phosphorus removal process (EBPR-process), most of the phosphorus eliminated during the water treatment, as well as that from cellular lysis, is released. So that, phosphorus concentration in the digester increases and precipitation problems can occur. In this work, anaerobic digestion process of waste activated sludge and primary pre-fermented sludge was studied in a pilot plant. Furthermore, phosphorus balance was performed in order to quantify phosphorus precipitation in the digester. Separate and mixed thickening of sludges was carried out with the aim of study its influence in the process. NOTE: This thesis is in Spanish.

El plan estratégico de comunicación Dec 27 2019 Toda organización, sea pública, privada, mixta u ONG, requiere de la interacción con “públicos” de diferente índole para lograr sus objetivos. Esa interacción es en esencia un proceso permanente de comunicación que, como tal, requiere ser gestionado. La forma de estructurar dicha gestión con lógica, coherencia, propósito y efectividad es a través del diseño, la elaboración y la implementación de planes estratégicos de comunicación (PEC). Este libro ofrece una completa contextualización del para qué gestionar la comunicación, así como consideraciones, ejemplos y recomendaciones de orden técnico y gerencial para hacerlo. A través de este, también se accede a un método concreto y estructurado que, descrito paso a paso, de manera práctica y específica, provee herramientas plenamente aplicables y presenta lo que usted debe tener en cuenta para diseñar y elaborar un PEC de forma apropiada.

Los castellanos del Perú May 12 2021 Este libro reúne contribuciones de destacados investigadores de la lingüística hispánica para ofrecer un panorama integral de los castellanos del Perú, incluidos algunos que han sido tradicionalmente objeto de discriminación, como el castellano andino, el amazónico y el afroperuano.

Los capítulos se concentran en diferentes variedades habladas en el Perú desde distintos enfoques teóricos y metodológicos, atendiendo a su formación, su contexto social e histórico y los fenómenos de contacto que las caracterizan. De este modo, aunque el volumen tiene un foco regional muy específico, los problemas que aborda son de interés y relevancia para el estudio de otras variedades del español, para el tratamiento de otros problemas derivados del contacto lingüístico y para la dialectología e historia de los castellanos latinoamericanos en general. Escrito en castellano, este volumen será de interés para estudiantes graduados en lingüística hispánica e investigadores dedicados a la dialectología, la sociolingüística y la lingüística del contacto.

Adoption and impact of OER in the Global South Aug

27 2022 Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and research in developing countries.

Sixty years after the first conference, the 2019 edition returns to Mexico. This book, *Geotechnical Engineering in the XXI Century: Lessons learned and future challenges*, presents the proceedings of the XVI Pan-American Conference on Soil Mechanics and Geotechnical Engineering (XVI PCSMGE), held in Cancun, Mexico, from 17 – 20 November 2019. Of the 393 full papers submitted, 335 were accepted for publication after peer review. They are included here organized into 19 technical sessions, and cover a wide range of themes related to geotechnical engineering in the 21st century. Topics covered include: laboratory and in-situ testing; analytical and physical modeling in geotechnics; numerical modeling in geotechnics; unsaturated soils; soft soils; foundations and retaining structures; excavations and tunnels; offshore geotechnics; transportation in geotechnics; natural hazards; embankments and tailings dams; soils dynamics and earthquake engineering; ground improvement; sustainability and geo-environment; preservation of historic sites; forensics engineering; rock mechanics; education; and energy geotechnics.
