This book is the product of a unique collaboration between Mainland Chinese scholars and scholars from the civil, common, and mixed jurisdiction legal traditions. It begins by placing the current Chinese contract law (CCL) in the context of an evolutionary process accelerated during China's transition to a market economy. It is structured around the core areas of contract law, anticipatory repudiation (common law) and defense of security (German law); and remedies and damages, with a focus on the availability of specific performance in Chinese law. The book also offers a useful comparison between the CCL and the UNIDROIT Principles of International Commercial Contracts, as well as the Convention on Contracts for the International Sale of Goods. The analysis in the book is undertaken at two levels - practical application of the CCL and scholarly commentary. This comprehensive and popular textbook aims to bridge the gap between theoretical study and practical application. It covers the essentials of construction contracts, including how the law has developed, the reasoning behind key clauses and how contract law is applied in practice, and it helps to make the transition from student to practitioner manageable. This text is intended for all undergraduates studying a construction contract law or a contract administration module or unit. It is ideal for postgraduate degrees in quantity surveying and building surveying, construction project management, and construction management. Civil engineers and students of architecture and architectural technology will find it provides a comprehensive guide to the law in the construction context. It is also very comprehensive in scope and provides sufficient materials to bridge the gap between the student and professional texts. Cases, Problems, and Materials on Contracts is known for pioneering the problem method of law school teaching. A staple in classrooms for decades, it stands out from other texts in the scope of its coverage and its use of short, carefully-constructed Problems to expose students to new concepts, reinforce what they have just learned, and stimulate thought. The Eighth Edition, the first since the passing of Thomas Crandall and the addition of David Horton as co-author, is more accessible than ever. It introduces complicated issues with a clear narrative summary or explicit statement of black-letter law. The cases have been tightly edited for best effect. The book can also be easily adapted to fit various pedagogical needs. Although it starts with “Agreement” and moves to “Consideration,” it is also designed for teachers who prefer to begin with “Consideration” or “Remedies.” It can be used in courses that both include and exclude sales. Finally, because it is shorter than most other texts in this field, it works in 4-unit, 5-unit, and 6-unit courses. New to the Eighth Edition: Substantial input from a new co-author means that the book contains scores of new cases, Problems, and narrative introductions to issues. Each opinion has been streamlined to enhance readability. Where possible, applicable Restatement of Contracts and Uniform Commercial Code sections have been printed in the text, saving students the cost of buying separate supplements. Professors and students will benefit from: Coverage of the basics of Contracts Law in a format that allows greater exposure to the legal concepts through the many Problems that fill each chapter alongside the most illustrative cases on point Assessment multiple-choice questions at the end of each chapter that are meatier than such questions in most books, focusing not on the “right answer” so much as on what real attorneys must consider when confronted with the issues presented The entire book’s approach not just to teach rules of law but to train students to be lawyers faced with commercial issues. For example, Problems sometimes ask students whether they would be committing malpractice if they took a certain course of conduct, an issue very much on the mind of actual attorneys but seldom mentioned in law school classrooms. This book is about one of the most controversial dilemmas of contract law: whether or not the unexpected change of circumstances due to the effects of financial crises may under certain conditions be taken into account. Growing interconnectedness of global economies facilitates the spread of the effects of the financial crises. Financial crises cause severe difficulties for persons to fulfill their contractual obligations. During the financial crises, performance of contractual obligations may become excessively onerous or may cause an excessive loss for one of the contracting parties and consequently destroy the contractual equilibrium and legitimate the governmental interventions. Uncomfortable economic climate leads to one of the most controversial dilemmas of the contract law: whether the binding force of the contract is absolute or not. In other words, unstable economic circumstances impose the

need to devote special attention to review and perhaps to narrow the binding nature of a contract. Principle of good faith and fair dealing motivate a variety of theoretical bases in order to overcome the legal consequences of financial crises. In this book, all these theoretical bases are analyzed with special focus on the available remedies, namely renegotiation, rescission or revision and the circumstances which enables the revocation of these remedies. The book collects the 19 national reports and the general report originally presented in the session regarding the Effects of Financial Crises on the Binding Force of Contracts: Renegotiation, Rescission or Revision during the XIXth congress of the International Academy of Comparative Law, held in Vienna, July 2014. Serving the needs of both students and experts, this book evaluates the CISG through economic theory and legal doctrine. Building on Chitty's content for Hong Kong, this 200-page supplement deals exclusively with Information Technology contracts, a new and increasingly important category of contracts in Hong Kong. It sets out in detail the different types of IT contracts, shrinkwrap, clickwrap and reseller arrangements, particular legislation that affects terms in IT contracts, and other special features of IT contracts such as: acceptance, supplier's performance warranties, IP warranties and indemnities, termination provisions, and escrow. This edited collection questions the assumptions about feminist perspectives on contract law made in mainstream textbooks and the ideologies that underpin them, drawing attention to the ways in which the law of contract has facilitated the virtual exclusion of women, the feminine and the private sphere from legal discourse. The international carriage of goods by sea has been regulated by international conventions. These include the "International Convention for the Unification of Certain Rules of Law relating to Bills of Lading" ("Hague Rules"); the "Protocol to Amend the International Convention for the Unification of Certain Rules of Law Relating to Bills of Lading" ("Visby Rules"); and the "UN Convention on the Carriage of Goods by Sea." They were adopted in 1924, 1968 and 1978 respectively and the transport industry's commercial needs have since substantially changed. Furthermore the advent of subsequent regimes has resulted in the uniformity in the carriage of goods by sea once provided by the Hague Rules being lost. In order to update and modernize existing regimes the "UN Convention on Contracts for the International Carriage of Goods Wholly or Partly by Sea" ("Rotterdam Rules") was adopted on December 11, 2008 by the UN General Assembly and opened for signature on September 23, 2009. Since then drafters of the Rotterdam Rules, academics and practitioners have been publicizing, discussing, and evaluating the Rules. This book is an effort to further explore those same goals. It

has been used for generations by lawyers as the leading guide to contracts, and is relied on to provide insight and aid in knotty areas of the law. The work is in two volumes: Volume One covers the General Principles of contract law, whilst Volume Two offers guidance on Specific Contracts, namely contractual issues in specific industry sectors. (Volume One of the work is available as a standalone for those who need coverage of the general principles of contract law only). The methodology in Cases and Problems on Contracts started as a successful experiment. Students are forced to exercise analytic thinking prior to coming to class and master basic contracts by working problems and dissecting cases. The material employs the problem method in tandem with case dissection to develop students' interest and increase their store of knowledge. A large number of the cases were decided in the twenty-first century and involve current issues. The coursebook also includes many cases involving lawyers' contracts to illuminate various aspects of professional responsibility demonstrating that the law governing lawyers' contracts is different. The two volumes of this revised work aim to provide unrivalled expertise for common law and commercial barristers and solicitors as well as academics and the judiciary. Its clear style ensures it can be read and understood by practitioners at all levels of expertise within contract law. Interpretation and explanatory narrative are supported by examples of case law and legislation. Volume I covers general principles, whilst Volume II deals with specific contracts. All key developments in case law and legislation since the 27th edition in 1994 have been incorporated into this edition. Full reference has been made to the Civil Procedure Rules, and the terminology arising has been used where relevant. The work is supplemented regularly to ensure it remains relevant and authoritative. The book aims to explore the remedy of damages in international sales transactions. Its focus is on the international contract law instruments such as the Convention on Contracts for the International Sale of Goods (CISG), the UNIDROIT Principles of International Commercial Contracts, and the Principles of European Contract Law. The issues addressed in the book include: the basis for the right to claim damages, definition and purpose of damages, the idea of limiting damages, principles underlying the award of damages, classification of losses and heads of recoverable losses, causation, foreseeability, mitigation, standards of proving losses and methods of calculating and determining the amount of damages. The book draws on the experience of some major legal systems in dealing with contract damages as well as on the body of cases and scholarly writings on the international instruments. In doing so, the book attempts to provide a justification for the existing rules on damages, highlights the problems in their interpretation and application, and proposes solutions to the existing problems in the light of relevant policies and goals pursued by the international instruments. The work will be of interest to practitioners involved in international commercial transactions, scholars and students interested in international commercial and comparative contract law. Higginbotham; Lepage and Co.; Chesson and Woodall, 18642 v.; 25 cmUnited KingdomIndia If a dispute between commercial parties reaches the stage of arbitration, the cause is usually ambiguous contract terms. The arbitrator often resolves the dispute by applying trade usages, either to interpret the ambiguous terms or to determine what the given contract's terms really are. This recourse to trade usages does not create many problems on the domestic level. However, international arbitrations are far more complex and confusing. Trade Usages and Implied Terms in the Age of Arbitration provides a clear explanation of how usages, and more generally the implicit or implied content of international commercial contracts, are approached by some of the most influential legal systems in the world. Building on these approaches and taking account of arbitral practice, this book explores possible conceptual frameworks to help shape the emerging transnational law of trade usage. Part I covers the treatment and conceptual grounding of usages and implied terms in the positive law of influential jurisdictions. Part II defines the approach to usages and implied terms adopted in the design and implementation of important uniform law instruments dealing with international business contracts, as well as in the practice of international commercial arbitration. Part III concludes the book with an outline of what the conceptual grounding of trade usages could be in the transnational law of commercial contracts. Designed for students who may not have ready access to a law library, and for students on part-time and distance learning courses, the Sourcebook series offers a collection of material from a diversity of sources. The sources are annotated to set the materials in context and to explain their relevance and importance.
